

Guide on How to Survive in Disaster : Homicide

1. Try to escape: If possible, try to get away from the situation as quickly and safely as possible. Leave your belongings behind and run in a different direction than the attacker.
2. Find a safe place: Look for a place to hide, such as a locked room or secure area. Turn off lights, lock doors and windows, and silence your phone.
3. Call for help: Call 911 or your local emergency number and give them your location. Stay on the line until help arrives.
4. Be prepared to defend yourself: If you cannot escape or find a safe place, be prepared to defend yourself. Use whatever objects you can find as weapons and aim for the attacker's face, eyes and throat.
5. Stay calm: Try to stay calm and think clearly. Remember that the attacker may be looking for a specific person or group and that you may be able to avoid being targeted.
6. Follow instructions: If the attacker is apprehended or surrenders, follow the instructions of the authorities and do not move or speak unless spoken to.

7. Seek help: After the incident, seek help from the authorities, friends, or family, and receive medical attention if needed.

It's important to remember that the best way to prevent a homicide is to be aware of your surroundings and trust your instincts. If you feel like you're in danger, try to leave the area as soon as possible and call for help.
